

# MAGLEV 93

Federal Railroad  
Administration

U.S. Army  
Corps of Engineers

## 13<sup>TH</sup> INTERNATIONAL CONFERENCE ON MAGNETICALLY LEVITATED SYSTEMS AND LINEAR DRIVES

MAY 19-21, 1993

ARGONNE NATIONAL LABORATORY  
ARGONNE, ILLINOIS, USA

## TABLE OF CONTENTS

<b>Development of Maglev Transportation in Japan: Present State and Future Prospects</b> Eisuke Masada	1
<b>Status Quo of Development of Super-conducting Maglev System in Japan</b> Syohiko Miyata, Kazuhisa Matsuda, and Mamoru Minemoto	7
<b>The Development of the Superconducting Maglev System</b> Kan-ichiro Kaminishi, Akio Seki, and Hitoshi Tsuruga	10
<b>Outline of HSST-100 System and Test Line in Nagoya</b> Masaaki Fujino	16
<b>High-Speed Magnetic Levitation Train Transrapid, Planning of the Development Program until 1995 and Prospects of Utilization in the Federal Republic of Germany</b> Ulrich Wieschollek, Willi J. Mayer, and Dieter Rogg	22
<b>Analysis of Prospective Transrapid Applications</b> H.G. Raschbichler, L. Miller and M. Wackers	29
<b>Results on the Operation of the Transrapid Test Facility in Emsland, North Germany</b> Fritz Polifka and Hans-Peter Friedrich.	35
<b>Maglev Programs in Korea</b> In-Kun Kim, Mun-Whan Yoo, Chanil Park, Hyun Kap Chung, and Kook-Hun Kim	41
<b>A General Survey of Chinese Maglev Train</b> J.S. Lian, J.W. Zhou, K.L. Zhang, and H. Jiang	46
<b>Present Status of Research for Maglev in Italy</b> G. Martinelli and A. Morini	51
<b>Status of Development and Future Prospects of Daewoo Maglev System in Korea</b> In-Dae Chung, Dal-Ho Im, and Chan-Il Park	54
<b>New Structure Electro-Magnetic Guideway for Maglev</b> Shunsuke Fujiwara, Kazuo Sawada, Hirotaka Natsuvara, Nobuhito Uchiyama, Yukio Saitou, Yoshitaka Kobayashi, Shigeya Oohama	60
<b>Electrodynamic Forces of the Cross-Connected Figure-Eight Null-Flux Coil Suspension System</b> J.L. He, D.M. Rote, and H.T. Coffey	64
<b>Self Nulling Hybrid Maglev Suspension System</b> Richard Herbermann	71
<b>Flux Canceling Maglev</b> Richard Thornton	75

<b>Maglev Transportation with Controlled Permanent Magnets and Linear Synchronous Motors</b>	82
H. Weh, A Steingrüber, and H. Hupe	
<b>Maglev Transit Technology in Russia</b>	88
Floyd A. Wyczalek	
	94
<b>The Organic Guideway Concept</b>	
Timothy Barrows	
<b>Magneplane Vehicle Dynamics Simulation</b>	101
W. Aitkenhead	
<b>Technology and Costing Considerations for Full Maglev System Development as Derived from Bechtel's SCD Exercise</b>	106
J.C. Perkowski	
<b>System Concept Definition of the Grumman Superconducting Electromagnetic Suspension (EMS) Maglev Design</b>	111
M. Proise, L. Deutsch, R.J. Gran, R. Herbermann, S. Kalsi, and P. Shaw	
<b>Maglev Cost and Performance Parametrics</b>	119
L. Deutsch	
<b>Analysis of Maglev Corridors</b>	125
G.R. White	
<b>Market and Energy Demand Analysis of a U.S. National Maglev System</b>	131
A. Vyas, and D. Rote	
<b>Reducing Magnetic Fields from Maglev Guideways to Reasonable Levels</b>	138
J.P. Blanchard	
<b>Loss and Guideway Interaction Force Measurements on a Superconducting Magnet for Maglev Applications</b>	142
C.R. Dauwalter	
<b>Magnetic Fields from a Maglev Linear Synchronous Motor</b>	147
D. Galler, and W.J. Greenberg	
<b>Magnet Design Optimization for Grumman Maglev Concept</b>	153
S. Kalsi, R. Herbermann, C. Falkowski , M. Hennessy, A. Bourdillon	
<b>Superconducting Magnet and Refrigeration System for Maglev Vehicle</b>	160
H. Nakashima, M. Terai, M. Shibata, M. Yamaji, Y. Jizo	
<b>Comparison of Magnetic Lift and Drag Forces for Two EDS Maglev Topologies</b>	165
J.R. Hale, D.B. Montgomery, R.D. Pillsbury, Jr., R.J. Thome, J. Feng, and A. Radovinsky	
<b>Transrapid TR-07 Maglev-Spectrum Magnetic Field Effects On Daily Pineal Indoleamine Metabolic Rhythms in Rodents</b>	171
Kenneth R. Groh	

<b>Innovative Spine Girder Guideway Design for Superconducting EMS Maglev System</b>	177
J.B. Allen, M. G. Ghali	
<b>Parametric Design and Cost Analysis for an EMS Maglev Guideway</b>	183
B.M. Bohlke, and D.B. Burg	
<b>Guideway and Infrastructure in JR Maglev</b>	189
K. Okada, A. Takano, and M. Yamazaki	
<b>Reduction of Guideway Residual Vibration through Strategic Vehicle Pad Spacing Arrangements</b>	195
R.S. Phelan	
<b>Alignment and Surveying of Magnetic Levitation Train Guideways</b>	201
H.J. Marx, and R. Stoeckl	
<b>Aerodynamic Drag of Maglev Vehicles</b>	206
F.A. Balow, K.R. Sivier	
<b>Maglev Secondary Suspension Using Electroactive Fluids</b>	212
D.K. Bhadra, C.R. Harder, and G. Mansfield	
<b>Maglev Vehicle Dynamic Interaction with Aerial Guideways</b>	218
L.E. Daniels, and D.R. Ahlbeck	
<b>Modeling and Control of Maglev Vehicles with Aerodynamic and Guideway Disturbances</b>	227
K. Flueckiger, S. Mark, and D. McCallum	
<b>Rail Irregularity and Module Response in HSST-100 System</b>	233
M. Iwaya	
<b>Five Degree of Freedom Analysis of the Grumman Superconducting Electromagnetic Maglev Vehicle Control and Guideway Interaction</b>	238
R.J. Gran, and M. Proise	
<b>Vehicles for Superconducting Maglev System on the Yamanasi Test Line (Except Linear Synchronous Motors)</b>	248
K. Takao, and N. Shirakuni	
<b>Overview of Maglev Vehicle Structural Design Philosophy, Material Selection and Manufacturing Approach</b>	253
P. Shaw	
<b>Aerodynamic Analysis of Grumman Maglev Vehicle</b>	259
M.J. Siclari, G. Carpenter, and R. Ende	
<b>Dynamics, Stability, and Control of Maglev Systems</b>	265
Y. Cai, S.S. Chen, S. Zhu, D.M. Rote, and H.T. Coffey	
<b>Linear Synchronous Motor Design</b>	271
Richard D. Thornton	

<b>Improvements of the Attractive Force Levitation Concept</b> H. Weh, H. May, H. Hupe, and A. Steingrüber	277
<b>Technical Assessment of Maglev System Concepts</b> James H. Lever	283
<b>Maglev Performance Simulation</b> G. Anagnostopoulos, J.E. Anderson, and F.L. Raposa	290
<b>Noise from High Speed Maglev Trains</b> Carl E. Hanson	298
<b>Magnetic Analysis of U.S. Maglev Designs</b> Howard T. Coffey, Jianliang He, and Zian Wang	304
<b>Control Strategies of a LSM Drive for EDS-Maglev Systems</b> F. Albicini, M. Andriollo, G. Martinelli, and A. Morini	310
<b>Longstator Linear Synchronous Motor (LLSM) Modeling for Simulation and Control System Design</b> J.A. Britton, and R.L. Klein	316
<b>Maglev Position Sensing and Control</b> T.M. Clark	322
<b>Methanol Reforming PEM Fuel Cells as an Onboard Power Source for Maglev Vehicles</b> B.T. Concannon	327
<b>Onboard Power Source Alternatives for Maglev Vehicles</b> B.T. Concannon	330
<b>Comparative Analysis of EDS and EMS Maglev Systems</b> A. DiGerlando, I. Vistoli, and M. Galasso	336
<b>Design Problems of Linear on Board Generators in EMS Maglev Transportation Systems</b> A. DiGerlando, and I. Vistoli	342
<b>On-Vehicle Power Generation at all Speeds for Electromagnetic Maglev Concept</b> S. Kalsi	348
<b>Present State of Development of Synchronous Long-Stator Propulsion System for TRANSRAPID Maglev Trains</b> U. Henning	352
<b>Power Supply System for Superconducting Magnetic Levitation System</b> H. Ikeda, H. Ohtsuki, J. Kitano, Y. Osada, N. Katoh, N. Morishima, and H. Aizawa	358
<b>Current Control for Thrust Force Controlling Inverter of HSST</b> I. Miyashita and Y. Ohmori	364

<b>A Novel Maglev System Driven by Air-Cored Linear Induction Motors</b> E. Levi, Z. Zabar, L. Birenbaum, and S.Y. Yoo	370
<b>Power Electronics for Linear Synchronous Motor Propulsion Systems</b> D.J. Perreault, and R.D. Thornton	374
<b>Analytical Evaluation of the Influence of the Armature Coils Distribution on the Thrust of Linear Synchronous Motor for Maglev</b> M. Trapanese	380
<b>Status of the Safety Certification Process of the Transrapid System</b> J. Blomerius	386
<b>Vertical Dynamics of a Superconducting Suspension System</b> D. Casadei, U. Reggiani, G. Serra, and A. Tani	392
<b>Maglev Command, Control, and Communication Systems Design Requirements Analysis and Safety-Critical Architecture</b> J.W. Lewis and R.Y. Yee	398
<b>Aerodynamic Braking Systems for Maglev Vehicles</b> J. Guglielmo, T.J. Zych, and K.R. Sivier	405
<b>Signaling System of Maglevtype HSST</b> F. Hashimoto	411
<b>Siemens Operations Control System for Maglev Trains</b> H. Eilers, V. Freitag, and R. Knigge	417
<b>Influence of JR Maglev on Environment</b> N. Kokubun, A. Honda, and M. Yasunami	420
<b>Train Control Systems for Super-conductive Magnetic Levitation System</b> K. Kubota, T. Tanaka, Y. Osada, S. Sasaki, and Y. Yokota	424
<b>Maglev Demonstration Project Site Location Study</b> L.C. Lennon	430
<b>The Environmental Impact of Maglev, a Comparative Study</b> M.C. McClintock	434
<b>Safety Evaluation Test for Electromagnetic Levitation Transport System H-100</b> T. Mizuma, Y. Satoh, and E. Masada	441
<b>A Dynamic Computer Simulation of a High Speed Maglev Vehicle</b> Cam de Pierre	446
<b>Maglev Automated Preventive Maintenance System</b> J.S. Ng, A.L. Harris and M.E. Amoon	452
<b>Using Existing Infrastructure to Make Maglev Work in the United States</b> C.M. Gillam, and E.E. Gilcrease	457
<b>Author Index</b>	463
