

**11th International Conference on**  
**Magnetically Levitated Systems and Linear Drives**  
**Maglev '89**

**July 7-11, 1989**  
**Yokohama, Japan**

**Sponsored by :** The Institute of Electrical Engineers of Japan  
**Co-sponsored by :** The Japan Society of Mechanical Engineers  
The Japan Society of Civil Engineers  
**Supported by :** Ministry of Transport, Japan  
**In cooperation with :** IEEE/Tokyo Chapter on Vehicular Technology Society  
Japan Railway Engineers' Association  
Japan Subway Association  
Railway Electrification Association

**The Institute of Electrical Engineers of Japan**

## Organizing Committee

Chairman :

*MASADA, Eisuke*

*The University of Tokyo*

Vice Chairmen :

*IGUCHI, Masakazu*

*The University of Tokyo*

*SAIJO, Takashige*

*Shibaura Institute of Technology*

Members :

*ARAI, Kouichi*

*Toshiba Corp.*

*DOI, Toshiaki*

*Central Japan Railway Co.*

*EBIHARA, Daiki*

*Musashi Institute of Technology*

*FUKAO, Tadashi*

*Tokyo Institute of Technology*

*HARADA, Minoru*

*Kobe Steel, Ltd.*

*HIGASHI, Katsutoshi*

*Mitsubishi Electric Corp.*

*HOSHINO, Akira*

*C. Itoh & Co., Ltd.*

*KAWASHIMA, Kunisada*

*The Institute of Electrical Engineers of  
Japan*

*KAWASHIMA, Maumi*

*Sumitomo Electric Ind., Ltd.*

*KITOU, Yukio*

*Nagoya University*

*KODAMA, Katsuhiko*

*East Japan Railway Co.*

*MAEKAWA, Norio*

*The Japan Electrical Consulting Co., Ltd.*

*MATSUNUMA, Shohei*

*West Japan Railway Co.*

*MURAKAMI, Kouichi*

*Tohoku University*

*NAGATA, Kinichi*

*Toyo Denki Seizo K.K.*

*OHBOSHI, Tsuneyoshi*

*Fuji Electric Corp.*

*OHISHI, Akira*

*HSST Corp.*

*ONOYAMA, Satoru*

*Ministry of Transport*

*ONUKI, Takashi*

*Waseda University*

*SHINTAKU, Masahiro*

*Japan Railway Engineers' Association*

*SAKAGUCHI, Tsutomu*

*Railway Electrification Association Inc.*

*TAKEI, Kenji*

*Hitachi, Ltd.*

*TANAKA, Hisashi*

*Railway Technical Research Institute*

## Program Committee

Chairman :

*MASADA, Eisuke*

*The University of Tokyo*

Vice Chairman :

*TANAKA, Hisashi*

*Railway Technical Research Institute*

Members :

*EBIHARA, Daiki*

*Musashi Institute of Technology*

*KATTA, Takehiko*

*Teito Rapid Transit Authority*

*KUSHIMA, Yoshihiro*

*The Institute of Electrical Engineers of  
Japan*

*MATSUDA, Shoji*

*Toshiba Corp.*

*MIYAIRI, Koumei*

*Hitachi, Ltd.*

*MIYAMOTO, Masayuki*

*Railway Technical Research Institute*

*MURAI, Munenobu*

*HSST Corp.*

*NAGAI, Masao*

*Tokyo University of Agriculture and Technology*

*OGATA, Masaharu*

*Mitsubishi Electric Corp.*

*OHSAKI, Hiroyuki*

*The University of Tokyo*

*OHSAWA, Teruyuki*

*Toyo Denki Seizo K.K.*

*SAIJO, Takashige*

*Shibaura Institute of Technology*

*SAKAGUCHI, Tsutomu*

*Railway Electrification Association Inc.*

*SAWADA, Kazuo*

*Railway Technical Research Institute*

*SHIMADA, Toshiro*

*Sumitomo Electric Ind., Ltd.*

*TERAUCHI, Nobuo*

*Railway Technical Research Institute*

*YOSHIOKA, Hiroshi*

*Railway Technical Research Institute*

# CONTENTS

<b>Magnetic Levitation Technology and its Development Potential</b> H. Weh	1
<b>State of Development and Future Prospects of the Maglev-Systems TRANSRAPID, M-BAHN and STARLIM</b> W. Menden, W. J. Mayer and D. Rogg	11
<b>Opportunities and Prospects for Maglev in North America</b> A. R. Eastham and H. T. Coffey	19
<b>The Linear Express</b> T. Doi, A. Seki and M. Uno	23
<b>Present Status and Prospect of HSST</b> T. Nagaike and H. Takatsuka	29
<b>Application of the Magnetic Levitation Train in the Federal Republic of Germany</b> H. G. Raschbichler and M. Wackers	37
<b>Selection of Routes for a Maglev High-Speed Transport System in the Federal Republic of Germany from a Future Operator's Point of View</b> R. Ribbentrop	47
<b>The U. S. Market for High-Speed Maglev Vehicles</b> D. M. Rote, H. Coffey, L. Johnson and E. Daniels	53
<b>Specific Aspects of Maglev Links in the Different Types of Connection with Air Transportation</b> J.-M. Willigens and H. G. Kraus	63
<b>Safety Requirements for Maglev Systems in Germany — Review and Forecast</b> H. Jansen	73
<b>Current Status of EDS System in Japan</b> J. Fujie	81
<b>Performance Analysis of the TRANSRAPID 07</b> L. Miller and W. Ruoss	85
<b>HSST-05 System General and Operational Outline at YES '89</b> A. Ohishi	93
<b>M-Bahn Maglev Transit System—Experience, Status, Application</b> K. Dreimann	101
<b>Technical Application of the MagLev High-Speed Transport System from the Operators' Point of View</b> F. Polifka	105
<b>The STARLIM Maglev</b> J. P. Pascal	111
<b>Maglev: An Emerging Transportation Technology to Meet an Imminent Transportation Need</b> R. A. Uher	115
<b>Application of TRANSRAPID Maglev in Long-Distance Routes in Japan</b> A. Hoshino, K. Otsuka and R. Kretzschmar	123
<b>Application of TRANSRAPID Maglev in Medium / Short-Distance Routes in Japan</b> K. Otsuka, A. Hoshino and R. Kretzschmar	129
<b>Electric Equipments of the Chuo Linear Express</b> A. Seki and T. Simomae	135
<b>LSM Control Method for Multiple Power Conversion Stations</b> H. Ikeda, I. Kawaguchi, J. Fujie, T. Uchiyama, K. Nakamura and S. Koike	141
<b>The Synchronous Long-Stator Propulsion System for TRANSRAPID —Present State of Development—</b> R. Friedrich, J. Eikermann and J. Ruppel	147
<b>A Study on the Power Supply Network for a Superspeed Maglev Transport</b> E. Masada, H. Ohsaki, M. Tamura and S. Torii	155
<b>Optimizing the Feeding System for Linear Synchronous Motor of EDS in Japan</b> S. Ishizu	161
<b>Harmonic Resonance Appearing in Input Side of Big Power Converter for Driving LSM</b> M. Kawaji, T. Saijo, H. Ikeda and S. Kaga	167

<b>A New Control Method for Forced Commutated PWM Cycloconverters Using a Microprocessor</b>	173
T. Furuhashi, A. Ishiguro, M. Ishida, S. Okuma and Y. Uchikawa	
<b>Non-Contact Energy Transfer to Automobiles</b>	179
P. Choudhury, G. E. Dawson, A. R. Eastham, V. I. John and J. H. Parker	
<b>New Modulation Method for VVVF Inverter for HSST-05</b>	185
I. Miyashita and Y. Ohmori	
<b>Auxiliary Power System for HSST-05</b>	191
H. Takei and K. Suzuki	
<b>Study of Linear Reluctance Motor for Electromagnetic Levitation System</b>	197
H. Yamaguchi and S. Yamamura	
<b>A Magnetic Suspension System of Linear Induction Motor — Control Method and Stability of Suspended Motion—</b>	203
T. Hikiyama, T. Hirata and Y. Hirane	
<b>Experimental Results of Single Sided L. I. M</b>	209
D. Im, E. Park and G. Kim	
<b>Study of Normal Force Reduction Type of Linear Synchronous Motor</b>	217
K. Miyashita, H. Kanazawa, H. Nihei and H. Kiwaki	
<b>Characteristics of Tubular Linear Induction Motor Energized by Optimized Primary Current</b>	223
T. Yamamura, T. Yokoi, A. Ishiyama, H. Numata, H. Kohyama and T. Onuki	
<b>New Type Superconducting Magnet for EDS System</b>	229
H. Nakao, M. Yamaji, K. Kurosawa, Y. Jizo, H. Nakashima and H. Tsuchishima	
<b>The Cryogenic System for Magnetic Levitation Vehicles</b>	235
H. Nakashima and T. Herai	
<b>Characteristics of the Combined Levitation and Guidance System Using Ground Coils on the Side Wall of the Guideway</b>	241
S. Fujiwara and T. Fujimoto	
<b>Study for Harmonic Ripple of Electromagnetic Force in Superconducting Magnetically Levitated Vehicle with Non-Rectangular Ground Coils</b>	245
T. Saitoh, K. Miyashita and H. Kiwaki	
<b>Magnet Concepts with One- and Two-Dimensional Stable Suspension Characteristics</b>	251
H. Weh, H. May and H. Hupe	
<b>Levitation Magnet Driver for HSST —Controlled by SI Thyristors—</b>	257
K. Nagata, H. Sekimoto and M. Murai	
<b>Dynamic Behaviour of the Module &amp; Suspension System on HSST-05</b>	263
M. Iwaya	
<b>Aero-Acoustic Investigations of the Magnetic Train TRANSRAPID 06</b>	269
H. Alscher	
<b>A Study on the Characteristics of the Aerodynamics of the Magnetically Levitated Transportation System (Maglev)</b>	275
S. Matsunuma, Y. Nagayama and S. Kobayashi	
<b>Development of Aerodynamic Brake of Maglev Vehicle for Emergency Use</b>	281
K. Oda, M. Azagami and M. Yoshimura	
<b>Concept of the Operational Safety System for the Chuo Linear Express</b>	287
A. Seki, S. Kato and T. Kawakami	
<b>Train Controls and Feeding Systems for Magnetically Levitated Systems</b>	291
Y. Hirao and T. Sasaki	
<b>Highly Reliable Control and Protection for the TRANSRAPID High Speed Maglev Transportation System</b>	297
H. Bimmermann, N. Geduhn, R. Knigge and E. Schnieder	
<b>Signal and Communication System of HSST-05</b>	303
F. Hashimoto	
<b>Rate of Electric Power Consumption and Installed Electric Power Capacity at Substation with On-Board Primary Linear Induction Motor-Driven Railway</b>	309
T. Mizuma and A. Matsumoto	
<b>A Jack System which Rectifies HSST Track Beams on Sinking Uni-Load Base Foundation</b>	315
K. Okada, M. Kakurai, M. Enokuchi, H. Hoshino and M. Iwaya	

<b>The Aspects of Design of Single-Sided Linear Induction Motors for Transport and Industrial Applications</b>	321
J. F. Gieras	
<b>Dynamic Characteristics of Urban Transit LIM with Feed-Back Speed Control</b>	327
S. Nonaka and N. Fujii	
<b>On the Reduction of Energy Consumption of Linear Induction Motors for Urban Transit</b>	333
S. Nonaka and T. Higuchi	
<b>Finite Element Analysis of Linear Induction Motors Taking into Account Discontinuity of Secondary Rails</b>	339
S. Nonaka and T. Furukawa	
<b>A Novel Control Scheme of a Linear Induction Motor</b>	345
T. Koseki, H. Ohsaki and E. Masada	
<b>Testing Machine of Hydrodynamic Forces Using Linear Motor</b>	351
T. Kawanishi, N. Takagi, T. Kato, W. Kato, J. Karita and Y. Takakado	
<b>Development of the Transport System with PM Type LPM</b>	357
T. Iwahana, T. Watanabe, Y. Asakawa, M. Yashiro, M. Inoue and D. Ebihara	
<b>Development of a Magnetically Suspended Stepping Motor for Clean-Room Transportation and Sample Handling</b>	363
T. Higuchi and H. Kawakatsu	
<b>Characteristics of a Linear Induction Motor to Vertical Drive System</b>	369
D. Ebihara, M. Watada, T. Aoki, T. Kageyama, T. Taira, M. Mori and M. Naito	
<b>Magnetically Levitated Transportation System for Automated Production Lines in Factories</b>	375
T. Minakata, T. Iwamoto, T. Shimada, Y. Hosoda and M. Kawashima	
<b>A New Electromagnetic Guidance Technology with No Guidance Magnets</b>	381
M. Morishita and T. Azukizawa	
<b>A Study on Fundamentals of Mechanically Controlled Permanent Magnet Levitation System for Maglev Transport Vehicle</b>	387
M. Abe, Y. Fukumoto and H. Tsunashima	
<b>Flexible Structure Control of Maglev Vehicles by Active Secondary Suspensions</b>	393
M. Nagai and Y. Sawada	
<b>Optimal Active Suspension to Improve the Dynamic Stability of Repulsive Maglev Systems</b>	399
M. Nagai, A. Moran and S. Tanaka	
<b>Bouncing and Pitching Oscillations of a Magnetically Levitated Vehicle Caused by Guideway Roughness (Excitation due to Nonlinearity of Magnetic Lift Force)</b>	405
H. Yabuno, Y. Takabayashi, M. Yoshizawa and Y. Tsujioka	
<b>Robust Servo Levitation Control and Running Simulation of Controlled-PM LSM Maglev Vehicles</b>	411
K. Yoshida, O. Nakashima and K. Yoshida	
<b>Real-time Control of a Nonlinear Maglev System Using Concurrent Processing Techniques</b>	417
P. K. Sinha	
<b>Stabilization for Flexible Beam System Controlled by Magnetic Suspension</b>	423
F. Matsumura, M. Fujita, Y. Ozaki and M. Shimizu	
<b>Dynamics between the Running Coupled Vehicles and Flexible Rail out of the Standard Type</b>	429
T. Nakagawa	
<b>Electro-Magnetic Levitation Control of an Elastic Plate</b>	435
Y. Oshinoya and T. Shimogo	
<b>Design of the Hybrid Magnet in the Magnetic Levitation System by the Boundary Element Method</b>	441
H. Amano, T. Murai and T. Onuki	
<b>Digital Control of Attractive Magnetic Levitation with Permanent Magnet</b>	447
K. Miyamoto, T. Murai, S. Koga and T. Onuki
